

## CLOSE WATCH

Last week, astronomers spotted a star that reaches top speeds of 25,000 km per sec. Dubbed S301, it is the closest known star to Milky Way's supermassive black hole Sagittarius A\*, and it could help scientists measure the black hole's most elusive characteristic: spin

# Spot a nerve agent in 13 secs

New Method Developed By Indian Labs Also Breaks Down The Toxin In Six Minutes

[ujjvayam@timesofindia.com](mailto:ujjvayam@timesofindia.com)

Scientists have long struggled to reliably detect nerve agents used in chemical warfare, not just because they are highly toxic, but because many sensors produce the same yellow colour as the chemicals they are trying to identify, making the signal easy to miss or misread. Now, researchers at the CSIR-Central Leather Research Institute (CLRI) in Chennai have found a solution: a nanomaterial that can detect and neutralise such compounds within 13 seconds.

The team has developed a cerium-based nanomaterial, a material engineered to behave like a natural enzyme, that reacts quickly to organophosphate compounds (nerve agents). Cerium (Ce) is the most abundant rare-earth metal and helps create the bright white light in energy-saving bulbs and LEDs. The CLRI team's nanomaterial is designed for on-site detection of contamination, not for medical or blood testing. It can be used to identify toxic residues on surfaces, equipment, or in industrial and environmental settings—situations where rapid, reliable detection is critical. When a nerve-agent-like chemical such as parathion comes in contact with it, the material breaks the chemical bond. The product then binds to cerium clusters in the structure, subtly changing how electrons move within the material. This shift shows up as a clear orange-brown colour, replacing the usual yellow signal. The change is visible even on a paper strip, while the material simultaneously breaks down the toxin. In lab tests, half the compound broke down in about six minutes.

"This nanomaterial is an arresters products with its binding to cerium clusters, triggering wavelength transition and enable quick detection," said Huidrom Mangalassan, the Amil A Vemkar of CLRI scientist this colour shift is central to the material's advantage.

The study, done in collaboration with Academy of Scientific and Innovative Research (ACSIR), Chennai, was published in *Chemistry - A European Journal*.

The challenge in detecting these compounds goes back nearly a century. According to a 2018 Scientific

## CRACKING THE TOXIC CODE

New Technology Detects Nerve Agents

**1 What are nerve agents?**  
Highly toxic chemicals that attack the nervous system and disrupt communication between nerves and muscles.

**2 How do they affect humans?**  
They block acetylcholinesterase, an enzyme needed for nerve signalling, causing muscle twitching, breathing difficulty, paralysis and, in severe cases, death.

**3 How can exposure occur?**  
Through inhalation, skin contact or contaminated surfaces.

American article, the first nerve agents were discovered accidentally in the 1930s when German scientists were trying to make cheaper and more effective insecticides stumbled upon that proved deadly even in tiny quantities. Two of these later were known as tabun and sarin. Their extreme toxicity soon led to their use as chemical weapons, with recorded instances ranging from the Iran-Iraq war to the Tokyo subway attack in 1995 and more recent targeted poisonings. Variants based on the same chemistry exist today in certain pesticides, though under tighter restrictions. The article notes that later compounds such as VX, first synthesised in the 1950s, were considered too toxic for agricultural use and entered military chemical weapons programmes. What makes them particularly dangerous is how they interfere with the body's nerve signalling. Some nerve agents such as VX enter the body through the skin. According to CLRI researchers, block acetylcholinesterase, an enzyme essential for nerve signalling, causing the nervous system to fail, often leading to paralysis and death even at very low exposure levels. Scientific American notes that early German researchers reported symptoms such as constriction of pupils, dizziness and breathing difficulty after accidental exposure to minuscule quantities. The present detection methods including gas chromatography, fluorescence probes and enzyme-based assays require sophisticated instruments or multiple agents, while some struggle to clearly distinguish between similar chemicals. A 2018 study published in *Scientific Reports* noted that effect of VX on the toxicity of organophosphate nerve agents (OPNAs), "acute toxicity of OPNAs has been well documented over the need to explore applicable strategies for the sensing, decontamination and/or detoxification of these compounds," said Giuseppe M. E. A. from the National Research Council of Italy. CLRI researchers said the next step is to translate the material into portable kits, possibly combined with smartphone-based readouts, to enable faster and more accessible detection of hazardous organophosphate compounds outside laboratory conditions. "It establishes newer avenues and mechanisms for the portable, accessible, easy and cost-effective detection of OP contamination through smartphone integration," said Vemkar.

## NOTABLE INCIDENTS

- Iran-Iraq War (1980s)**  
Iraqi forces used chemical weapons, including sarin, during the conflict.
- Halabja, Iraq (1988)**  
Thousands of Kurdish civilians were killed in one of the deadliest chemical attacks on civilians.
- Tokyo Subway Attack (1995)**  
Members of the Aum Shinrikyo cult released sarin gas in the Tokyo subway, killing 13 people and injuring thousands.
- Syria (2013-2017)**  
Investigations linked multiple attacks involving sarin to the Syrian civil war.
- Sergei Skripal Poisoning (2018)**  
Former Russian spy Sergei Skripal and his daughter were poisoned in the UK with a Novichok nerve agent.

**WHY RAPID DETECTION MATTERS**  
Even tiny amounts can be deadly. Quick detection helps identify contaminated areas, protect emergency responders and speed up decontamination efforts.

The study led by Anil Barik of IISc and Anant Jain of CHINTA, involved researchers from Washington University School of Medicine too. The finding, published in *Cell Reports*, could eventually point towards new ways of treating cold allodynia, the condition that makes cold painful. Drugs such as oxalipatin can damage nerves outside the brain and the spinal cord, causing chemotherapy-induced peripheral neuropathy (CIPN), which makes cold unbearable for some patients. Barik told TOI treated mice with oxalipatin and studied their neurons while being exposed to cold. They focused on a neural route running from a region called the lateral parabrachial nucleus (LPBN) to the parabrachial nucleus (PB), part of the thalamus, a deep-brain structure involved in relaying and processing sensory information. Researchers found that chemotherapy-induced nerve damage strengthened communication along this pathway. Neurons in the PB receiving signals from the LPBN became particularly active when the mice reacted to cold by licking or shaking their paws, behaviours that indicate pain and attempts to cope with it. But was the circuit merely responding to the pain, or was it helping create the response? To find out, the team switched the pathway on and off using techniques that allow specific groups of neurons to be controlled. Activating the LPBN-PB pathway made the mice respond more strongly to cold, suggesting the circuit was involved not only in the physical sensation of pain but also in the unpleasant emotional response that accompanied it. Suppressing the pathway had the opposite effect. The mice showed less cold-induced pain behaviour and were more willing to tolerate cold temperatures. The findings suggest that the circuit acts as a link between pain signals and the brain's decision to respond to it. Researchers also examined a neighbouring part of the thalamus called the centromedian nucleus (CM). Its connection with LPBN appeared to be more involved in the emotional and motivational state of pain, while the LPBN-PB pathway was more involved in the sensory and emotional responses. The researchers say the circuit needs to be studied in more cases of nerve injury and pain.

## LAST WEEK'S QUICK QUIZ

Question on Aug 26: Who is the ancient Vedic scientist identified by name from hieroglyphic text in July 2007? Answer: Sak Tahn Waa

### OSB STATE BANK OF INDIA

Specialised SME Branch (63646), 4B-8-16, 1<sup>st</sup> Floor, V Space Building, Beside V-Hotel, Srirangar, Dwarakanagar, Visakhapatnam, Andhra Pradesh - 530016.  
Authorised Officer's Details: Name: Mr. Dipi Prakash Sahu (Chief Manager), Mobile No. 637075695, For Property Inspection: 637075695

## E-AUCTION SALE NOTICE

SECURITY INTEREST (ENFORCEMENT) RULES, 2002 READ WITH PROVISIONS 4(2) & (8) (SALE OF MOVABLE & IMMOVABLE ASSETS CHARGED TO THE BANK UNDER THE RECONSTRUCTION OF FINANCIAL ASSETS AND ENFORCEMENT OF SECURITY INTEREST ACT, 2002). The undersigned as Authorized Officer of State Bank of India has taken over physical possession of the following properties viz 1341 of the SARFAESI Act 2002. Public at large is informed that e-auction (under SARFAESI Act, 2002) of the charged property is being conducted for realisation of Bank's dues will be held on "AS IS WHERE IS" and "AS IS WHAT IS" and "WHATSOEVER THERE IS" BASIS and on the terms and conditions specified hereunder. (Borrowers): 1. M/s. Seven Hills Solvents Private Limited Represented by its Directors Shri Anuraj Jha and Mrs. Radha Devi Jha, Plot No. 42, 43, 44, 50, 51 & 52, APIC ID-4, Nelimala Village, Vizianagaram, Andhra Pradesh-535022. 2. Smt. Radha Devi Jha, W/o Late Gopal Jha, D No-7-5-7/2(10), 2<sup>nd</sup> Floor, Samudri Apartment, Pandurangapuram, Visakhapatnam, Andhra Pradesh, India-530003. Also at: Singapore City Sunflower East Block (A Block), 4<sup>th</sup> Floor, Flat No. 407, Revenue Ward-7, Dasannapeta, Vizianagaram, Andhra Pradesh-535002. 3. Shri Anuraj Jha, D No-7-5-7/2(10), 2<sup>nd</sup> Floor, Samudri Apartment, Pandurangapuram, Visakhapatnam, Andhra Pradesh, India-530003. Also at: Singapore City Sunflower East Block (A Block), 4<sup>th</sup> Floor, Flat No. 407, Revenue Ward-7, Dasannapeta, Vizianagaram, Andhra Pradesh-535002. 4. Smt. Radha Devi Jha, W/o Late Gopal Jha, D No-7-5-7/2(10), 2<sup>nd</sup> Floor, Samudri Apartment, Pandurangapuram, Visakhapatnam, Andhra Pradesh, India-530003. Also at: Singapore City Sunflower East Block (A Block), 4<sup>th</sup> Floor, Flat No. 407, Revenue Ward-7, Dasannapeta, Vizianagaram, Andhra Pradesh-535002. 5. Shri Anuraj Jha, D No-7-5-7/2(10), 2<sup>nd</sup> Floor, Samudri Apartment, Pandurangapuram, Visakhapatnam, Andhra Pradesh, India-530003. Also at: Singapore City Sunflower East Block (A Block), 4<sup>th</sup> Floor, Flat No. 407, Revenue Ward-7, Dasannapeta, Vizianagaram, Andhra Pradesh-535002. Demand Notice Date: 12-08-2025. Outstanding Amount as per Demand Notice: Rs. 76,95,997/- as on 11.08.2025 with future interest and other expenses thereon from 12.08.2025.

**Description of the Properties**  
Property No. 1: Factory Land and Building bearing survey No. 326P/327P, Plot No. 42 to 44 and 50 to 52 measuring an extent of 12551.46 sq. yds. situated at Industrial Development Area, Nelimala Village, Vizianagaram, Andhra Pradesh vide original Doc. No. 266/2001 executed by Andhra Pradesh Industrial Infrastructure Corporation Limited in favour of M/s. Seven Hills Solvents Private Limited. **Boundaries of Property:** East: Plot No. 45 and 53; West: Plot No. 41 and 49; North: 16 meters wide road; South: 16 meters wide road. **Property No. 2:** The land bearing Survey No. 325, 326, 327, plot Nos. 45 & 46 measuring an extent of 3631.30 sq. yds. situated at Industrial Development Area, Nelimala Village, Vizianagaram vide original Regt. Sale Deed Doc. No. 306/2002 executed by Andhra Pradesh Industrial Infrastructure Corporation Limited in favour of M/s. Seven Hills Solvents Private Limited. **Boundaries of Property:** East: Road No. 7; South: Plot No. 53B/54; West: Plot No. 44; North: 16 meters wide road. **Reserve Price: Rs. 80,00,00,00/- EMD: Rs. 80,10,00,00/- Bid Multiplier Amount: Rs. 50,00,00,00/-**

**Date of E-auction: 16-09-2026 Time: 11:00 AM to 04:00 PM**

**Date & Time of Inspection of Property: 29-08-2026 to 16-09-2026 From 10.00 AM to 04.00 PM.**

**TERMS AND CONDITIONS OF THE E-AUCTION ARE AS UNDER:**  
1) For detailed terms and conditions of the sale, please refer to the link provided in State Bank of India, the Secured Creditor's website [www.sbi.co.in/webcontent/in-the-news-auction-notices](http://www.sbi.co.in/webcontent/in-the-news-auction-notices). For Registration, EMD, Auction Details etc., visit <https://banknet.sbi.co.in> or Toll free Number: +91-8291228220, Mail ID: support.banknet@sbil.com. 2) The purchaser shall bear the applicable stamp duty, transfer charges, fees etc. 3) All the statutory / non-statutory dues, taxes, rates, assessment charges, fees etc. 4) The interested bidder may deposit Pre-Bid EMD with PSB India before the close of E-auction. Credit of Pre-Bid EMD shall be given to the bidder only after receipt of payment in PSB India account and updation of information in the e-auction website. This may take some time as per banking procedure and hence bidders, in their own interest, are advised to submit the pre-bid EMD amount well in advance to avoid any last minute problem. 5) As per Section 194-I of the Income Tax Act 1961, TDS @ 1% will be applicable on the sale proceeds where the sale consideration is Rs. 50,00,00,00/- (Rupees Fifty Lakhs) and above. 6) The successful bidder/purchaser shall deduct the TDS from the sale proceeds (Government guideline, where the sale is higher and deposit the same with the Income Tax Department in Form No. 16-B and submit the original receipt of the TDS Certificate to the Bank. (Applicable for immovable property, other than Agricultural land). **Date: 25-08-2026, Place: VISAKHAPATNAM** (Sd/-) Authorized Officer, STATE BANK OF INDIA

## HON'BLE JUSTICE S. P. TALUKDAR ONE MAN COMMITTEE

5 Council House Street, Kolkata - 700 001

**PUBLIC NOTICE FOR E-AUCTION FOR SALE OF IMMOVABLE PROPERTIES RELATING TO ANNEX, PINCON, PAILAN, RAMEL, KOLKATA WEIR, VIBGYOR, TOWER INFOTECH, BASIL INTERNATIONAL, MULTIPURPOSE BIOS, SILICON GROUP, SWARNABHUMI GROUP**

Justice (Retd.) S. P. Talukdar One Man Committee, Hon'ble High Court of Calcutta is going to hold public auction (e-auction) of some properties of Annex Infrastructure India Limited Group of Companies, Pincon Group of Companies, Pailan Group of Companies, Ramel Group of Companies, Pincon Group of Companies, Vibgyor Group of Companies, Basil International Group of Companies, Tower Infotech Group, Basil International Group of Companies and Swarnabhumi Developers Group of Companies. Interested persons are requested to visit [www.justicesptalukdarcommittee.com](http://www.justicesptalukdarcommittee.com) or Auction Information on Recovery Proceedings in 'Enforcement' tab on [www.sebi.gov.in](http://www.sebi.gov.in), or <https://auctions.quick.com> for details. **Securities and Exchange Board of India** (on behalf of Justice S. P. Talukdar One Man Committee) **Place: Kolkata** **Date: August 29, 2026**

## ECONOMIC OFFENCES WING, TAMIL NADU

### NOTICE FOR SALE OF IMMOVABLE PROPERTIES

In this Hon'ble High Court monitored sale of commercial properties of defaulted financial establishment, namely Neemas Properties Pvt. Ltd. and its sister concerns, are proposed to be brought for sale by E-tender on E-auction through the MSTC website (<https://www.mstcindia.com>). The interested bidders may participate in the event by registering in MSTC and depositing Pre-Bid EMD on the website. Further, for the details of the properties and updates, the bidders may visit the EOW website ([www.mstcindia.com](http://www.mstcindia.com)).

| Date of Assistance to the bidders by the MSTC officials for Registration in the MSTC Portal in online mode | 07.09.2026 to 25.09.2026                                                   |
| Date of auction                                                                                            | 29.09.2026, 30.09.2026 to 30.09.2026, 05.00 PM (Auto extension applicable) |

**Pre-Bid EMD (Except Eligible Neomas Depositors):** Must be deposited well in advance as per the MSTC auction details and requirements.

**Minimum Incremental Value:** Rs. 10,000/-

The properties are to be auctioned on an 'as is where is' condition on the basis of the title deeds on record. It is for the bidders to satisfy themselves of the title and also the physical details and participate in the auction on their own best judgment.

The successful bidder, once zeroed in by the MSTC, will be confirmed only after placing it before the Court. The rejection, the EMD amount will be returned to the participant(s).

Once the bid is confirmed, the entire sale price has to be deposited by the successful bidders (Except the Neomas depositors who bid without pre-bid EMD) within ten (10) days from the date of confirmation of the auction, failing which the EMD will be forfeited.

\*Neomas depositors who claim exemption from Pre-Bid EMD can view their status in the excel sheet posted on the EOW website.
