RBI likely to hike rates by 75 bps by April: JP Morgan

Expects Nifty To Touch 29K Points By End Of Next Year

Mumbai: American brokerage JP Morgan on Thursday said it expects the Nifty 50 benchmark to surge by 12% and be at 29,000 points by the end of next year. The brokerage expects three more rate hikes of 0.25% each by the Reserve Bank in the Dec, Feb and April monetary policy reviews.

"Indian equities enter 2027 with support from improving corporate profitability, easing oil prices, resilient consumer demand, strong domestic credit growth, and a broadening private capex cycle," the brokerage said in a note. The brokerage expects an earnings growth of 12% for companies in the MSCI India basket in 2026, which will accelerate to 14% in 2027.

Factors, which are working for India and may result in a re-rating include cheaper oil and firm currency that can lower import costs, improve corporate margins and support earnings, it said, adding that private capex is also broadening with listed companies raising spending 25% in H1FY27 led by smaller firms and policy-backed industries.

CRUDE PRICE EASING

The 8th Pay Commission rollout can put Rs 7.2 lakh crore in the pockets of the 1.2 crore govt employees and pensioners till FY29, while premiumisation and welfare spending continue to support consumption ahead of seven state elections in 2027, it said.

Additionally, the digital economy is projected to reach 20% of gross value added by 2029-30, which would help both agriculture and manufacturing, it said. However, elevated valuations, domestic policy headwinds, and global uncertainties may limit further gains, reinforcing the need for a selective, disciplined, and risk-aware approach, it added.

India is not competing with artificial intelligence-heavy markets, and is offering itself as a potential safe haven for investors seeking to diversify away from or reduce "crowded AI exposures", it said. The country's equity markets, which have received over $14 billion of flows from foreign institutional investors in Nov, can get another $100 billion if foreign long-only investors were to simply bring their Indian equity exposure back to benchmark weight, it said.

It said strong macro momentum, faster credit growth and a capex cycle increasingly led by the private sector could shift India's earnings revisions from downgrades to upgrades, and support the earnings growth with consumption holding up. From a sectoral perspective, the brokerage is overweight on financial stocks, industrials, healthcare, and consumer discretionary, and underweight on information technology. AGENCIES

Wipro lands BP's $600mn finance ops mega deal

Shilpa.Phadnis
@timesofindia.com

Bengaluru: After securing a $1 billion deal with Olam and a $650 million engagement with Phoenix Group, Wipro has landed another mega deal, this time with energy major BP, to transform its finance operations in what sources told **TOI** is a $600 million engagement.

The deal will see about 3,000 BP employees across India, Hungary and Malaysia transition to the IT services company.

The multi-year engagement will leverage Wipro's capabilities in artificial intelligence (AI), automation and business transformation to improve efficiency, simplify processes and strengthen BP's finance operations. An email sent to BP and Wipro on the size of the deal did not elicit a response by press time. The new operating model is expected to take effect in 2027, subject to applicable conditions. Under the arrangement, BP will retain overall accountability for standards, controls, data and technology governance, while PwC will provide controls oversight.

Kate Thomson, chief financial officer of BP, said the partnership would help the energy company build simpler and more efficient finance operations while providing employees with opportunities to develop their skills. "Wipro brings specialist digital capabilities and investment that will help us make better use of finance operations technology, deliver value for the business more quickly and simplify how we work."

India's GDP growth in Q2 seen at 7.6%: Ind-Ra

Says Investment Will Be The Main Driver

New Delhi: The Indian economy is likely to grow 7.6% in the second quarter of the current fiscal year, driven primarily by investment growth, India Ratings and Research (Ind-Ra) said on Thursday.

The Sept quarter growth in FY27 compares with 8.1% expansion recorded in Q2 of FY26 and 7.8% growth in the April-June quarter.

Ind-Ra also raised its GDP growth estimate for full FY27 to 7.2%, up from 7.1% earlier. The Indian economy expanded 7.8% in FY26. The current fiscal year will mark the sixth consecutive year of growth above 7%, potentially reaching an average of 7.8% during FY22-27, said Ind-Ra chief economist Devendra Kumar Pant.

CONSUMPTION SQUEEZE: Investment leads growth; consumption faces pressure in the second half of FY27

"Investment remains the main growth driver (average growth FY22-FY27: 10%), supported by private consumption (7.7%), with investment growth outpacing consumption growth," Pant added. Govt is slated to release GDP growth data for July-Sept on Nov 30.

Last month, the RBI forecast 7.2% growth for the second quarter, while the finance ministry's Monthly Economic Review sees growth at 7.35%. The RBI has projected GDP growth of 7.1% for the full 2026-27 fiscal year.

Ind-Ra said investment would be the growth driver in Q2, with gross fixed capital formation (GFCF) estimated to have grown 10.5% year-on-year in Q2 FY27. Both production and import investment indicators remained strong in Q2 FY27. The agency estimated stable consumption growth in Q2, with private final consumption expenditure (PFCE) slowing marginally to 6.8% in Q2 FY27 (Q1 FY27: 7.1%). PTI

Infra projects see cost overrun of ₹3.3L cr

New Delhi: Infrastructure projects worth more than Rs 150 crore each recorded a cumulative cost overrun of approximately Rs 3,28,452 crore, according to a monthly govt report for Oct 2026.

About 1,862 ongoing infrastructure projects across 17 central ministries and departments were monitored, and it was found that the total revised cost was Rs 38,11,292 crore compared to the original cost of Rs 34,82,840 crore. However, the report did not specify the actual number of projects that faced cost overrun.

The cumulative expenditure incurred on these projects stands at Rs 17.9 lakh crore, accounting for approximately 46.9% of the project cost, indicating steady progress in project implementation, the Ministry of Statistics and Programme Implementation (MoSPI) said in its monthly report for Oct.

A significant proportion of projects are at advanced stages, with 649 projects (35% achieving over 80% physical progress, while 326 (18%) have crossed 80% financial completion. The data also reflects a balanced pipeline, with projects distributed across early and advanced stages of implementation. Out of 1,862 ongoing infrastructure projects, there are 790 Mega projects (project cost of Rs 1,000 crore & above), and 1,072 Major projects (below Rs 1,000 crore).

The Transport & Logistics sector accounts for the highest number of ongoing projects (1,324), with a cumulative cost of Rs 20.37 lakh crore, underscoring the priority given to connectivity-driven infrastructure growth. The report said that the physical and financial progress broadly move in tandem, with a large number of projects clustered at the initial (20%) and advanced (100%) stages, indicating a pipeline of newly started projects alongside many nearing completion.

While physical progress exceeds financial advancement in the 100% range, financial progress is relatively higher in the early stages, reflecting upfront expenditure patterns in project implementation. PTI

EPFO to rework process of selling equity investments

Shiva.Rajora@timesgroup.com

New Delhi: The Employees' Provident Fund Organisation (EPFO) is working to overhaul how it sells its investment in equities to comply with Sebi regulations, which require transactions with its fund managers to be worth at least Rs 25 crore.

Under EPFO's current mechanism of redeeming its equity investments, units in exchange-traded funds (ETFs) are sold based on the exact day they were bought five years ago. However, because daily investment amounts vary, the units bought on any single day are often not worth Rs 25 crore when the time comes to sell them.

According to calculations by UTI Mutual Fund, which manages part of the EPFO's equity portfolio, the retirement body may be unable to meet Sebi's Rs 25 crore minimum threshold on roughly two-thirds of trading days in 2026-27 under the existing rules. Specifically, sales would be blocked on 159 out of 246 trading days for its UTI Nifty 50 ETF, and on 186 days for its UTI Sensex ETF, TOI has learnt.

To solve the problem, EPFO's central board of trustees (CBT) is slated to discuss a new policy at its meeting next week. Instead of treating each day's investment separately, the new framework will pool together all stock units that have completed the mandatory five-year holding period. This pool will then be divided into equal daily batches for selling to maintain liquidity.
